

Kenwood Place Road Realignment

Sycamore Township, OH

When Midland Atlantic added a movie theatre to the Kenwood Place project, Bayer Becker was the obvious choice to provide roadway relocation design services. Bayer Becker's expertise in private development and in public works provided Midland Atlantic with a cohesive project that allowed private and public construction to occur simultaneously. Bayer Becker was also familiar with the site and area regulations, having provided site design services for Kenwood Place. The new theatre required additional "overflow" parking which was to be provided by the Kenwood Towne Centre located across Kenwood Road.

Bayer Becker evaluated several options for the overflow parking and anticipated pedestrian movements. The relocation of the Kenwood Towne Centre access drive to align with the Kenwood Place access drive and signalization of the intersection was determined to be the most cost effective solution.

Bayer Becker completed traffic analysis, specifically, turn lane analysis, storage length calculations, and traffic signal warrant analysis. Based on the results and recommendations of the analysis, Bayer Becker prepared construction drawings for the relocation of the Kenwood Towne Centre access drive, modification of the Kenwood Place access drive, and traffic control plans and traffic signal plans for the Kenwood Road/ Kenwood Place/Kenwood Towne Centre intersection. The project also involved closing the existing Kenwood Towne Centre access drive and parking lot modifications to the Kenwood Towne Centre parking lot to accommodate the access changes.

Due to the nature of the retail area of Kenwood, it was imperative that the construction be complete and the roadways, traffic signal, and parking areas be entirely operational prior to the Thanksgiving 2011 holiday. Bayer Becker worked closely with the Township, County, Owner and Contractors to ensure that the aggressive schedule was met. Project management and coordination was provided throughout design and construction so that construction could occur simultaneously. Bayer Becker also provided coordination with the Township and County throughout the project.

To ensure quality, Bayer Becker takes an interdisciplinary approach to the arrangement, appearance, and design where creativity meets functionality in all our roadway development projects.

Through interdisciplinary collaboration, Bayer Becker creates places that improve the quality of urban, ecological, and social environments.

Please contact us, to learn more about why Bayer Becker is among the top roadway design consultants in Greater Cincinnati, and the Ohio Kentucky Indiana tri-state region. Our [Civil Engineers](#), [Transportation and Traffic Engineers](#), [Landscape Architects](#), [Planners](#), and [Land Surveyors](#) are professionally licensed and ready to assist you in meeting your development goals.

Project Stats

Client:	Midland Atlantic
Location:	Sycamore Township, OH
Year:	2010
Market:	Roadway Infrastructure
Project Size:	4.00 Intersections

Services Provided:

Land Surveying

Topographic Surveys

Civil Engineering

Grading & Earthwork Analysis
Storm Water Collection System
Street Reconstruction

Transportation Engineering

Intersection Design
Roadway Design
Signal Warrant Analysis
Signing & Striping Plans
Traffic Signal Design

Landscape Architecture & Planning

Design Standards and Guidelines
Irrigation Plans
Planting Plans
Preliminary Budgeting - Final Cost Estimating
Site Planning
